

Job Title: Design Manager

Reporting to: Senior Design & BIM Manager

Overview:

The post holder will manage the design process from inception through preconstruction and construction stages to completion, ensuring that designs are developed to fully meet the employer's criteria as well as the commercial objectives, time constraints and contractual requirements, giving due regard to cost in use, life cycle costing and buildability issues

Experience:

- Proven experience in design/architecture.
- Minimum of 5 years' experience managing design teams / elements of construction projects.

Knowledge, qualifications, and competencies:

Essential:

- Degree level qualification in Architecture
- In-depth knowledge of all aspects of a construction project.
- Strong IT skills and ability to use multiple software disciplines, including Microsoft Office packages, Microsoft Project, basic REVIT and Navisworks knowledge.
- Experience of delivering BREEAM Excellent projects and knowledge of the current 2018 BREEAM requirements.
- Thorough understanding of 3D design and BIM to fully comply with ISO 19650, with a desire to drive improvements and benefits through embracing digital construction.
- Good commercial understanding of contracts, procurement routes and risk management.
- Strong leadership and management skills, fostering a positive and collaborative approach to design to bring together architects, structural engineers and service engineers, along with specialist designers, with the aim of producing a coordinated design.

Desirable:

- Chartered membership of the RIBA
- You will ideally have delivered a full Asset Information Model including COBie output, in direct response to the client's PLQ's, working closely with both design team members and supply chain partners.

To apply for this position, please send your CV and covering letter to Val White, email val@wynneconstruction.co.uk.
